

Web Buffer Module VU6-1600

Web Buffer Module

Web Buffer Module VU6-1600

Purpose

The vacuum unit stores sufficient paper that any paper web retraction by the printer is ensured if the need arises. In addition, the vacuum unit prevents folding over or creasing of the loops after the printer at high printer speeds and when using lightweight paper.

Method of operation

The paper web emerging from the printer is drawn into a loop by means of a vacuum. In the event of a printer stop, the loop is sufficient to permit a controlled paper web retraction. The loop length is controlled by means of a photocell.

Basic equipment

- Vacuum unit
- Photocell loop initialization 1

Web Buffer Module VU6-1600

Technical versions

Superstructure 1600

Optional equipment

Photocell loop initialization 2

Sensor memory management

Roller in-feed bottom

Fastening TU/UP

Details for this module will follow in the next days!

Specifications

Web width

165mm - 520.7mm

6.5" - 20.5"
